

Predicting Ratings Based On Drug Reviews

Data

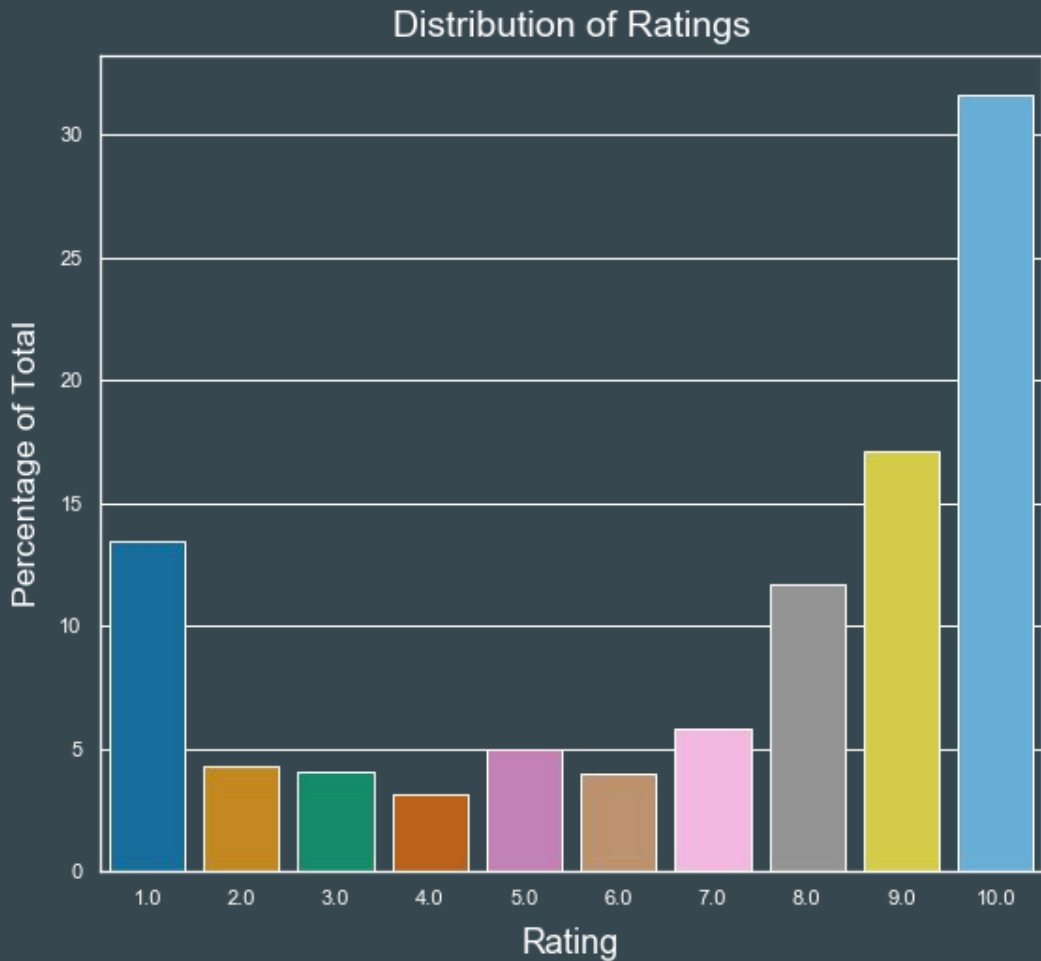

- Data pulled from Kaggle
- ID, drug name, condition, review, rating, date, useful counts

Goal

- Predict rating of drug based on the review

Distribution of Ratings

- Most ratings are 8 or higher
- Denser at the ends

Conditions That Had Best Ratings

- Birth Control
- Depression
- Anxiety
- Pain
- Acne

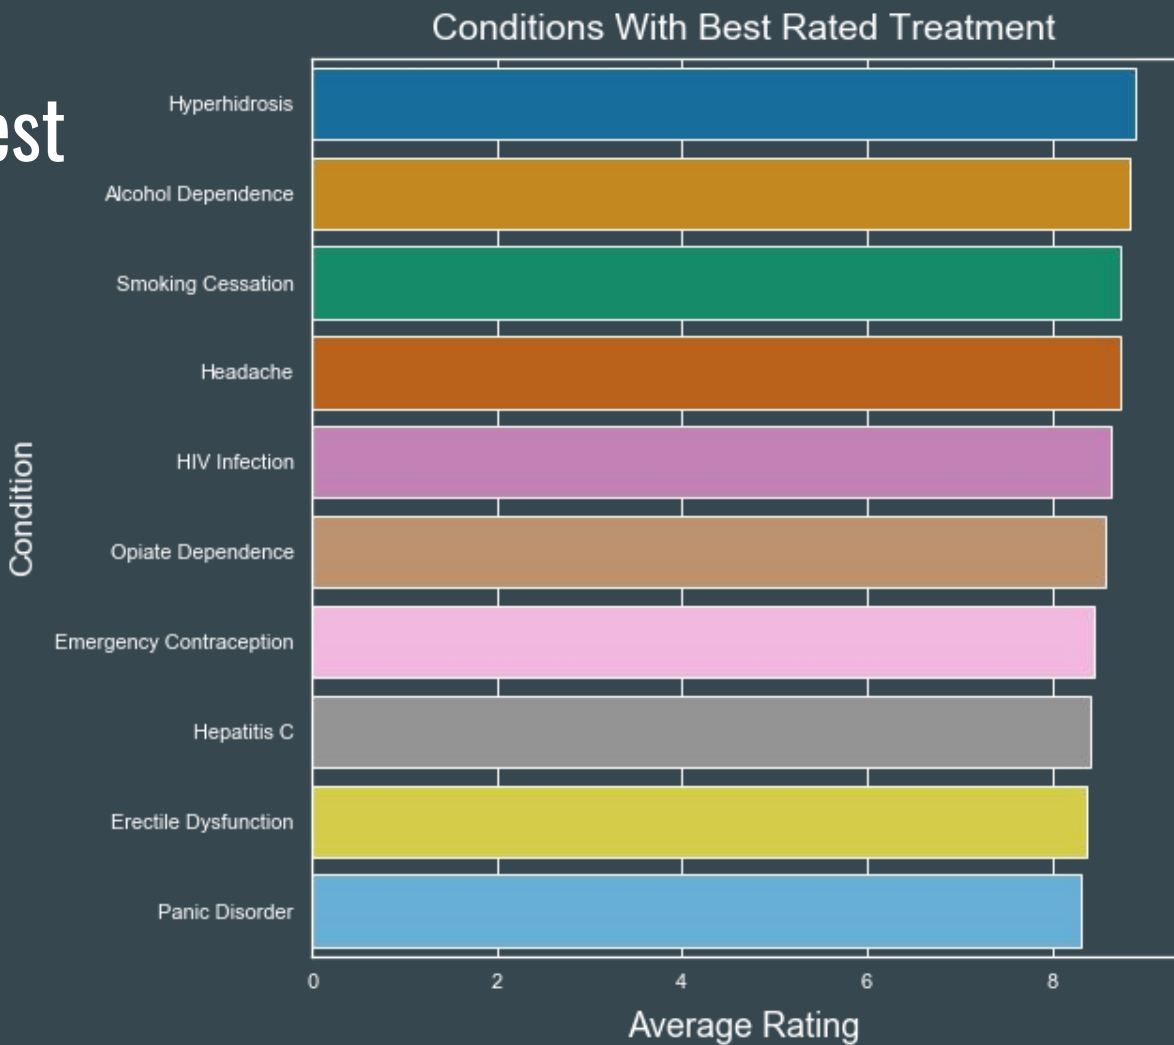

Conditions That Had Worst Ratings

- Birth Control
- Vaginal Yeast Infection
- Depression
- Abnormal Uterine Bleeding

Conditions With Highest Rated Treatments

- Average all ratings of treatments for each condition
- Hyperhidrosis
- Alcohol Dependence
- Smoking Cessation
- Headache

Conditions With Worst Rated Treatments

- Average all ratings of treatments for each condition
- Vaginal Yeast Infection
- Abnormal Uterine Bleeding
- Urinary Tract Infection
- Bladder Infection
